k. Description of Application: Progress Energy Carolinas, Inc. (licensee) filed an updated shoreline management plan (SMP) for Lake Tillery, one of the project's reservoirs. The current SMP was approved on November 24, 2004, and included a provision for the licensee to update the SMP every 10 years. The licensee's goal for the updated SMP is to balance the protection and enhancement of the environmental, scenic, and recreational values provided by Lake Tillery and the surrounding project lands, while ensuring the continued safe and reliable production of hydroelectric power at the project. Among other things, the updated SMP includes a more recent shoreline habitat survey and a reduction in the number of shoreline classifications.
